

Procedure for Granting Permission to Register the Software House on Behalf of the Business Owner/Corporation - Submitting a digital form

This service allows dealers (individuals and corporations - software houses) to grant permission to various parties in their organization (on behalf of the software house) for digital operations and processes with the tax authority.

Permissions are granted for a period of time of the user's choice (up to one year) and may be revoked at any time.

Permissions must be granted by the corporation/entity listed in the letter of undertaking for:

-  **The ID number of the person submitting the digital application**
-  **The ID number of the user requesting access to the developer portal.**

The following actions are required:

1. Visit **your** tax authority's personal area at <https://secapp.taxes.gov.il/srsherutatzmi>

Note: If you have not yet signed up for the Tax Authority's online services, you must first complete a registration and identification procedure before continuing with the procedure as detailed below. (Please note - do not enter with a company card, the entrance is with an ID number in the personal area)

2. In the event that the software house is a corporation, you must first enter: "Registering Corporate Details".

רישום פרטי תאגיד 

In the registration process, the system will ensure that there is a connection between you and the corporation according to the definitions, and a number of verification questions will be asked about the corporation. A corporation can only be registered by **an officer** as listed on the site (and at the end of the procedure).

3. Then, go back to the personal area, click "Authorize Digital Operations", and select the corporation for which you want to grant permissions. The corporation who want to give permissions for it.

לפעולות
דיגיטליות

(If you are a "corporate officer", you will be presented with the option to authorize other users to perform the actions you have defined - meaning to delegate permissions to another).

4. Select the authorizer (corporation/entity) in the drop-down window.
5. The authorization number must be specified. (Whoever submits the digital form + who submits the application in the developer portal).
6. Select the service **"API Services - Developer Management in Developer Portal"**.
7. Select for which period the permission is granted. (Limited to one year).
8. Please confirm the statement about this authorization. (in the personal area)
9. If the person you have authorized has previously signed up for the Tax Authority's online services, they will receive a text/email inviting them to accept the permissions you have granted.

If they have not yet registered, they should proceed to the personal area for identification and registration beforehand. In the personal area, they will need to click on the "Authorization for Digital Actions" button to adopt the permissions they have received and start operating in the approved applications. (and make the authorization status **"Active"**).

Notes:

- ✓ Only after the authorization becomes “active” can you submit a digital form.
- ✓ There is no limit to the number of authorized persons.
- ✓ You can view the permissions you have granted and those granted by others in your organization at any time, and you can revoke any permission you have granted or that has been granted by another entity at your level of permissions or at a lower level.
- ✓ About two weeks before the expiration of the authorization, you will receive a text/email notification with a reference to your personal area at the Tax Authority.

For assistance with technical questions regarding granting authorization, please contact the API support center at 02-5688444 or via email: APIsupport@taxes.gov.il
Support will be provided Sunday through Thursday from 8:00AM to 5:00PM

For assistance in granting permissions for “Businesses”, please contact *4954 ext. 9.

Below are details of the types of users who are allowed to register a corporation and grant permissions in the system:

Individual – may authorize an individual or a corporation to perform certain digital operations on his or her behalf.

Company - Any director of the company may authorize a person to perform certain digital operations on behalf of the company and may also grant authorizations to authorize others.

Registered Partnership (at the Partnership Registrar) - Each partner in a registered partnership may authorize a person to perform certain digital operations on behalf of the partnership and may also authorize others to authorize.

Unregistered Partnership (VAT Partnership) - A representative partner in an unregistered partnership may authorize a person to perform certain digital operations on behalf of the partnership and may also authorize others to authorize.

Association - An authorized signatory in the association may authorize a person to perform certain digital activities on behalf of the association and may also grant authorization to authorize others.

Anyone authorized to authorize others may authorize an individual to act on behalf of the certification provider on matters in which they have received certification only.

It should be clarified that all of the position holders listed above (directors, partners, signatories) automatically have “super authorization” in the system regarding the corporations in which they are active.

Good luck!
